### **Comparison with results from previous years:**

The average number of non-compliances WN/per home has dropped continuously from 2014 (11.8) to 2015 (10.8) to 2016 (7.9).

The average number of VPC/home has also dropped: 2014 (5.4); 2015 (5.0), and 2016 (4.3).

The average number of CO/home has also declined from 2014 (1.1) to 2015 (1.0) to 2016 (0.9).

This downward trend for all non-compliances issued during RQI inspections over the last 3 years is a very encouraging sign!

**The MOHLTC completed an RQI on 600 of the 630 LTC homes in the province in 2015.**
